

CISC 360: Programming Paradigms

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat Jana Du edu_assist_pro
Queen's Un

Fall 2022

Lecture logistics

- This lecture is (supposed to be) recorded
- The recording will be edited minimally, if at all
 - If you need me to edit out something you said, let me know <https://eduassistpro.github.io/>
- If you're participating ~~Add WeChat edu_assist_pro~~, you can use the Zoom chat, but ~~Assignment Project Exam Help~~ always notice it immediately

Well, here we are

- I have managed to not get COVID yet
- I had cancer
- Please wear a mask
 - N95 / 95PFE / FFP3 if you can
- My mask is N95 + 95PFE (Canada)
 - + FFP3 (European standard)
- Open windows whenever you can
 - QUFA, the faculty union, filed a grievance over inadequate ventilation in lecture halls
- *Please stay home* if you have symptoms or were exposed

Queen's University is endangering us

- Masks work (especially N95s)
 - Yes, they are annoying
 - Long COVID can be worse than annoying

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Carbon dioxide monitoring

Assignment Project Exam Help

<https://eduassistpro.github.io/>

- Proxy measure for amount of breath
• (And how much you've been cooking with gas)
- Rough upper baseline of COVID risk
- High CO₂ also impairs cognition
- If this gets too high, I will end the lecture

Syllabus

- Instructors are permitted (even not in a pandemic) to change the syllabus *until the end of the second week*
Assignment Project Exam Help

- Instructors have <https://eduassistpro.github.io/> how students are assessed.
Add WeChat: edu_assist_pro

I have the right to hold tests and exams over onQ even if Queen's says we are teaching in person

Now

- Who am I?
- Hello, what is this course about?
 - What is a paradigm?
 - Functional programming
 - Logic progr <https://eduassistpro.github.io/>
- Logistics [Add WeChat edu_assist_pro](#)
- Next time...

Who am I?

Jana / Prof. Jana / Prof. Dunfield

pronouns: she/her

Add WeChat edu_assist_pro

Carnegie Mellon —2007→ McGill —2010→
MPI-SWS —2014→ UBC —2017→ Queen's

Who am I?

- I study “programming languages”:
 - Logical and mathematical foundations of programming languages
 - Reasoning about programs and programming languages
 - Formal methods <https://eduassistpro.github.io/>
 - Types (so many types) [Add WeChat edu_assist_pro](#)

I am transgender

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

(a vegan cheesecake that was ordered for me
by my colleagues in the School of Computing)

Who am I?

Jana / Prof. Jana / Prof. Dunfield

<http://dunfieldlab.ca/> Assignment Project Exam Help

jana@cs.quee <https://eduassistpro.github.io/> Queen's University

Add WeChat edu_assist_pro

Virtual office hours (Miceams): TBA

Indoor office hours: maybe, if so, masks will be required

Hello, what is this course about?

- World domination?

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

World domination: this time for sure!

- 196x: Algol was going to dominate
- 1970: PL/I was going to dominate
- 1980: C was going to dominate
Assignment Project Exam Help
- 1990: C++ was going to dominate
https://eduassistpro.github.io/
 - James Gosling: why he would dare to design a New Language
- 2000: Java was going to dominate

If you keep programming after you graduate...

...you will have to learn languages you don't know yet (and maybe haven't been invented yet)

Learning a new functional language will be easier if you already know one (like Haskell)

<https://eduassistpro.github.io/>

Learning a new logic programming language will be easier if you already know one (like Prolog)

The more languages you know, the easier it becomes to learn new ones

Different languages for different purposes

- Machine-level programming: assembly
- Low-level programming: C, C++, Rust
- Web development: JavaScript, TypeScript, ...
- “Scripting”^{Assignment Project Exam Help}: bash, zsh, Python, Ruby, ...
- Numerical c <https://eduassistpro.github.io/>, R, Fortran, ...
- Symbolic computing^{Add WeChat edu_assist_pro}: Lisp, Scheme, OCaml,
- Deductive reasoning: Prolog, Twelf, Agda...
- Destroying (?) the world’s economy: Haskell

“Programming Paradigms”

- What is a paradigm?
 - “a typical example or *pattern* of something; a *model*... a *worldview* underlying the theories and methodology of a particular scientific subject” (Oxford English Dictionary)

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

“Programming Paradigms”

- What is a *programming paradigm*?
 - object-oriented programming
 (“object-oriented paradigm”—163K results)
 - imperative ~~Assignment Project Exam Help~~
 (“imperative” results)
 - functional <https://eduassistpro.github.io/>
 (“functional ~~App WeChat~~ paradigm” ~~edu_assist_pro~~)
 “the *functional paradigm* tely changes the way we think about programming”
 —theburningmonk.com

“Programming Paradigms”

- What do these mean?
 - object-oriented programming languages
 - imperative programming languages
 - functional

~~Assignment Project Examples~~

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

“Programming Paradigms”

- Object-oriented

features	languages

Assignment Project Exam Help

- Imperative

features	https://eduassistpro.github.io/
	Add WeChat edu_assist_pro

- Functional

features	languages

“Programming Paradigms”

- Object-oriented

features	languages
objects, classes, inheritance, (methods), (instance variables)	Simula-67, Smalltalk, C++, Java, Python (?), OCaml (?)

Assignment Project Exam Help

- Imperative

features	https://eduassistpro.github.io/
commands (“statements”), variable assignment, (procedures), (structs)	I-60, PL/I, Pascal, (?), Python (?)

- Functional

features	languages
functions, (recursion), <i>no</i> variable assignment	Lisp, Scheme, Racket, OCaml, Haskell, Python (?), Java (??), C++ (???)

“Programming Paradigms”

- Lots of (?) and overlap (like Python)
- Possible to write in a functional style in many languages
(use lots of a [Assignment Project Exam Help](https://eduassistpro.github.io/) ons)
<https://eduassistpro.github.io/>
- Possible to write in a pointer-oriented style in many languages
(C with function pointers inside structs)
[Add WeChat edu_assist_pro](#)

Functional programming (in Haskell)

- “Pure” or “side effect-free” programming
 - no assignment to variables (no overwriting)
 - no loops
 - lots of ~~Assignment Project~~ Exam Help
(anything you can do <https://eduassistpro.github.io/>)
 - no printing; ~~Add WeChat edu_assist_pro~~ printing
 - No side effects often makes it **easier to reason about programs**
- Functions can take functions as arguments
- Functions can build new functions

Functional programming (in Haskell)

(\x -> x + 1) 3

4

a function has no name

\: supposed https://eduassistpro.github.io/

parameter name: WeChat edu_assist_pro

function body: x + 1

Functional programming (in Haskell)

```
(\x -> x + 1) 3
```

4

```
add1 = map (\x -> x + 1)
```

```
:type add1 https://eduassistpro.github.io/  
add1 :: Num b => [b] edu_assist_pro
```

```
add1 [1, 10, 100]
```

```
[2, 11, 101]
```

Logic programming (in Prolog)

- Unlike Haskell, Prolog is not usually considered **general-purpose**
- Instead, for **deductive reasoning**
 - A Prolog program is a set of **facts** combined with rules about deriving (deducing) “new” facts

Fact: smoky(br) <https://eduassistpro.github.io/>

Rule: on_fire(X) :- smoky(X) [Add WeChat edu_assist_pro](#) X) then on_fire(X)"

$$\frac{\text{smoky}(X)}{\text{on_fire}(X)} \text{ (CISC 204)} \quad \forall X (\text{smoky}(X) \rightarrow \text{on_fire}(X))$$

Is British Columbia on fire?

Logic programming (in Prolog)

- Unlike Haskell, Prolog is not usually considered **general-purpose**
- Instead, for **deductive reasoning**
 - A Prolog program is a set of **facts** combined with rules about deriving (deducing) “new” facts

Fact: smoky(brit <https://eduassistpro.github.io/>

Rule: on_fire(X) :- smoky(X) [Add WeChat edu_assist_pro](#)

Is British Columbia on fire?

1. smoky(british_columbia) [Fact]
2. on_fire(X) :- smoky(X) [Rule]
3. on_fire(british_columbia) [X = british_columbia] 1, 2

Aside: Similar to a 204 natural deduction proof, except Prolog has fewer built-in rules.

Writing programs systematically

- Reasoning about Haskell programs by **stepping** (tracing)
- Proving properties of programs (by stepping)
- Defining what logical rules
 - Assignment Project Exam Help
- “Running” them at <https://eduassistpro.github.io/> (Prolog)
Add WeChat edu_assist_pro

Some learning outcomes

- Write short programs in a functional language such as Haskell or LISP, including the use of recursion, lists, higher-order functions.
[Assignment](#) [Project](#) [Exam](#) [Help](#)
- Use structures to solve simple assertions about programs.
<https://eduassistpro.github.io/>
[Add WeChat edu_assist_pro](#)
- Write short programs in a functional language such as Prolog.
- Predict the behaviour of small programs written in either paradigm.

Logistics

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Logistics

- Course material
 - Notes, code, slides
- Instructor and TA office hours
 - (being organized) Assignment Project Exam Help
- Discussions <https://eduassistpro.github.io/> designed to let students ask (and answer) questions without feeling intimidated
 - You can be anonymous to other students, but not to me and the TAs

Course grade

- Assignments (5?): 35%
 - Lowest mark dropped
- Quizzes (3): 35%
 - in onQ Assignment Project Exam Help
 - Lowest mark <https://eduassistpro.github.io/>
- Final exam: 30%
 - Add WeChat edu_assist_pro
 - in onQ, no proctoring

Textbooks

- None.
- Several years ago, these were required:
 - Simon Thompson. *Haskell: The Craft of Functional Programming*, third edition.
 - Ivan Bratko <https://eduassistpro.github.io/>
Intelligence,
...and then became optional.
...and now I don't really recommend them,
but you're welcome to look at them if you like.

Academic integrity

- Don't copy (from anyone or anywhere)
- Don't allow anyone to copy from you
- Work on individual assignments individually
Assignment Project Exam Help
- Get help from
<https://eduassistpro.github.io/>
- On Piazza: you can ask questions about assignments, but I will answer them—let me and the TAs decide how much to “give away”
 - Please do answer general questions!

Academic integrity

- Sometimes people are tempted to “depart from academic integrity” because they feel desperate
 - Ask for Assignment Project Exam Help
 - Helping individual one of the best platforms <https://eduassistpro.github.io/>
Add WeChat edu_assist_pro

Asking for help

- Try to ask for help as early as you need to
 - “need to” ≠ “can” (believe me, I know)

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Academic Consideration

- Example: If you become ill and can't write a quiz, go to the link below and fill out a request
- [Assignment Project Exam Help](https://www.queensu.ca/artsci/undergrad-students/aca)
[join-for-students](https://eduassistpro.github.io/)
Add WeChat edu_assist_pro
- *one 3-day request with documentation*
- In general,
I don't need to know personal details
- If you're not in ArtSci, consult your Faculty

Academic Consideration

- If the official system takes too long (which it will, because COVID), or you get rejected for silly reasons:

Assignment Project Exam Help

email me

[.ca](https://eduassistpro.github.io/)
<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Academic Accommodation

- Accommodations are now handled online
- You no longer need to email instructors your QSAS letter

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Software

- Haskell: two major alternatives
 1. GHC (Glasgow Haskell Compiler)
("Haskell Platform")
 - If you use Windows / mend WinGHCi
 - macOS / <https://eduassistpro.github.io/>
 2. hugs

Assignment Project Exam Help
Add WeChat edu_assist_pro

They give different, but often equally confusing, error messages

Software

- Prolog: SWI-Prolog
 - more information when we get into Prolog, around Week 7

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

Software

- A text editor
 - *not* a word processor (Word,TextEdit, ...)
 - Atom (Windows, macOS, Linux)
 - Notepad ~~Assignment (Windows Project Exam Help)~~
 - If you're old Aquamacs (<https://eduassistpro.github.io/> be:
Add WeChat edu_assist_pro

To do in Week 1

1. Sign up on the 360 Piazza:
 - <https://piazza.com/queensu.ca/fall2022/cisc360>
 - Good for Q & A and discussions
 - onQ for everything else
2. Maybe try to log in to easilab machines
(possibly use <https://eduassistpro.github.io/>)
3. *Start trying*
(it's sometimes AddWeChat edu_assist_pro)
4. Find a text editor or IDE that (ideally) supports Haskell well

Next:

Basics of Haskell
(lec2.pdf and (lec2-slides.pptx or lec2-slides.pdf))

Thank you

- If you have questions, you may:
 - follow me into the Mac-Corry courtyard
(behind Dunning Hall)
 - Turn left, turn right, go straight, go out
 - contact me <https://eduassistpro.github.io/>
